SUMMARY

Aspiring Full-Stack Developer and Founder focused on AI-driven solutions and proactive risk mitigation. Experienced in building scalable MERN and mobile applications with a distinct focus on social impact, user role assignment workflows, and innovative system architectures.

SKILLS

Languages/Frameworks : Java, Python (FastAPI), JavaScript (React, Node.js), MERN Stack, React Native

Development/Tools : Mobile App Development (Expo CLI / Capacitor), Web Design, AWS, Git

Core Competencies : Project Management, Team Leadership, Technical Content Writing, Public Speaking

EDUCATION

MLR Institute of Technology

B. Tech in Computer Science and Engineering (Current CGPA: 8.23/10)

Expected 2027

Hyderabad, TS

Vathsalya Institute of Science and Technology

Diploma in Computer Science and Engineering (CGPA: 8.78/10)

2024

Anantharam, TS

MJPTBCWREIS

Secondary School Certificate (CGPA: 10.0/10)

2021

Sulthanabad, TS

PROJECTS

Smart LoadMate: AI-Driven Logistics Assistant | React Native, FastAPI, MongoDB, Expo App Bundling

- Engineered an AI-assisted cloud logistics coordination platform designed to address traditional goods transportation inefficiencies like poor vehicle utilization and empty-return loops.
- Implemented dynamic role-based access control rendering distinct dashboard interfaces for Shippers and Drivers alongside specialized variables (e.g., load metrics, Tata Ace/Mini Truck selection).
- Integrated Geolocation APIs enabling active vehicle monitoring, route tracing, and real-time ETA updates when a trip shifts to an transit state.
- Live: smart-loadmate.vercel.app | Repo: [GitHub](#)

Shotweave: AI-Powered Production OS | React, FastAPI, Python, AI/ML

- Engineered an AI-powered financial OS designed to transform cinematic production scheduling and resource allocation.
- Implemented predictive risk mitigation models to analyze ongoing resource parameters and maintain monetary tracking parameters.
- Live: shotweave.vercel.app | Repo: [GitHub](#)

Resolveit: Public Issue Solving Platform | MERN Stack, Cloudinary

- Built a dual-platform community application leveraging backend routes to securely process, document, and store community-reported public infrastructure concerns.
- Designed data mutation distribution frameworks utilizing MongoDB and Node.js for scalable file management workflows.
- Live: resolveit-community.me | Repo: [GitHub](#)

EXPERIENCE & LEADERSHIP

Naxrita India

DevCon Associate (Intern) – On Site

Mar. 2026 – May 2026

Hyderabad, TS

- Assisted in backend software validation, environment maintenance, and cross-team application staging frameworks.
- Collaborated on-site to run debugging protocols, inspect transactional server processes, and verify database consistency.

LYFSpot (Startup Initiative)

Founder & Lead Developer | lyfspot@zohomail.in

Oct. 2020 – Present

Hyderabad, TS

- Initiated and led a software startup team to sketch, architect, and deploy custom digital utility assets from scratch.
- Managed full-stack application lifecycles, structured repository updates, and established clear team communication standards.
- National Cinema Hackathon**: Formally recognized for core creative project submission and team participation.
- NPTEL Elite Certification**: Industry 4.0 and Internet of Things (IoT) Embedded Environments.
- Effective Communication**: Certified in Public Speaking and presentation mechanics by the corporate Impact Foundation.
